

# Zeeshan Altaf

Data Analytics / Data Science

**Email:** zeshaltaf@outlook.com    **Mobile:** +61423865626  
**LinkedIn:** Zeeshan Altaf    **Portfolio:** zeeshan-altaf.github.io

## Career Objective

Data Analyst / Data Scientist who is keen to contribute through actionable insights with expertise in Python, SQL, Power BI, and Excel. Experienced in machine learning, natural language processing, predictive analytics, and big data processing that can help automate processes and solve business problems through data-centric solutions. Proven ability to design and implement data science pipelines, statistical models, data visualization solutions, and business intelligence dashboards that deliver actionable insights and support data-driven decision making.

## Education

|                     |                                                                                                                                                                                                                                                                                                                               |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jul 2023 – Jun 2025 | <b>Melbourne Institute of Technology (MIT), Australia</b><br><i>Master of Data Analytics (CGPA: 6.33/7.0)</i> <ul style="list-style-type: none"><li>Data &amp; Information Management, Mathematical &amp; Statistical Methods, Data Science, Artificial Intelligence, Predictive Analytics, and Big Data Analytics.</li></ul> |
| Sep 2014 – Aug 2018 | <b>University of Education, Pakistan</b><br><i>Bachelor of Business Administration (CGPA: 3.64/4.0)</i> <ul style="list-style-type: none"><li>Statistical Inference, Operations Management, Financial Management, Business Communication, Organizational Behaviour, and Marketing Research.</li></ul>                         |

## Work Experience

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nov 2022 - Present  | <b>Sand4U, Sydney, Australia</b><br><i>Operations Manager</i> <ul style="list-style-type: none"><li>Streamlined processes to mitigate discrepancies in orders and deliveries, resulted upto 80% decrease in errors.</li><li>Built and maintained dashboards for inventory, sales and deliveries, saving 30% time by reducing manual work.</li><li>Led a team to fulfill orders effectively and efficiently.</li></ul>  |
| May 2022 - Oct 2022 | <b>Insight Driven Research (IDR), Lahore, Pakistan</b><br><i>Analyst, Market Research</i> <ul style="list-style-type: none"><li>Analyzed the requirements of quantitative and qualitative research projects.</li><li>Devise strategies to find the right expert for research, increased experts pool by 10%.</li><li>Communication and negotiation with C-suite executives for market research consultation.</li></ul> |
| Sep 2020 - Jun 2021 | <b>Leverify LLC, Remote, USA</b><br><i>Amazon Shipments Officer</i> <ul style="list-style-type: none"><li>Analyzed and provided solutions for discrepancies in shipments.</li><li>Reconciliation and reimbursement of lost products, worth up to USD 1 Million.</li><li>Collaborated with cross-functional teams to define, design, and transform existing processes.</li></ul>                                        |
| Jan 2019 - Aug 2020 | <b>Vivo Smartphones, Lahore, Pakistan</b><br><i>Channel Officer</i> <ul style="list-style-type: none"><li>Critically analyzed channel problems and implemented effective solutions.</li><li>Market analysis to identify market gaps and explored 3 new markets which increased market share by 7%.</li><li>Trend analysis and forecasting to make market competitive strategies.</li></ul>                             |

## Academic Projects

---

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Large Language Models (LLMs) | <b>Multi-class news classification by fine-tuning pre-trained LLMs</b> <ul style="list-style-type: none"><li>Built a dynamic news categorization by analyzing current news categorization datasets using latent feature analysis.</li><li>Performed data cleaning, feature engineering, and exploratory data analysis to extract relevant features.</li></ul>                                                                                      |
| Vision Transformers (ViTs)   | <b>Improvised Explosive Devices (IEDs) detection in dustbins using ViTs</b> <ul style="list-style-type: none"><li>Applied feature extraction methods to the IED dataset after processing them through the attention map of ViTs.</li><li>Fine-tuned multiple ViTs to classify explosive devices in waste receptacles.'</li></ul>                                                                                                                   |
| Classification               | <b>Predicting outcome of patients after heart attack</b> <ul style="list-style-type: none"><li>Used advanced analytics techniques to predict patient outcomes (fatal or non-fatal) within 72 hours of hospital admission.</li><li>Addressed data skewness using various data sampling techniques.</li><li>Extensive data cleaning, formatting, and important features extraction using exploratory data analysis EDA to minimize errors.</li></ul> |
| Forecasting                  | <b>Time Series Analysis to forecast electricity price (Australia)</b> <ul style="list-style-type: none"><li>Time series analysis in R using electricity dataset.</li><li>Applied pre-processing methods and performed extensive exploratory data analysis (EDA) for accurate analysis.</li><li>Present the findings using advanced data visualization.</li></ul>                                                                                   |
| Big Data                     | <b>Big Data Analytics on AWS</b> <ul style="list-style-type: none"><li>Extract, load and transform big datasets using Hadoop ecosystem.</li><li>Query data for analysis using Hive and SQL.</li><li>Built a dashboard in Tableau to visualize trends and insights.</li></ul>                                                                                                                                                                       |

## Tools and skillset

---

|                                  |                                                                    |
|----------------------------------|--------------------------------------------------------------------|
| Programming & Query Languages    | Python, R, and SQL                                                 |
| Data Analysis & Machine Learning | NumPy, Pandas, Scikit-learn, Supervised, and Unsupervised Learning |
| Data Visualization               | Power BI, Tableau, Matplotlib, and Seaborn                         |
| Big Data & Cloud                 | AWS, Hadoop, Hive, and Pig Latin                                   |

## Certifications

---

- Data Analysis with Python (Coursera ID: 845ZLKCD6ZTM)
- Data Visualization & Communication with Tableau (Coursera ID: UQ65ZWJ2RZQ)
- Data Wrangling, Analysis & A/B Testing with SQL (Coursera ID: JQNGFDENQY5D)
- SQL for Data Science (Coursera ID: AJFVKDFKBNGN)
- Data Visualization in Excel (Coursera ID: 5N436LARHJD9)
- Excel Fundamentals for Data Analysis (Coursera ID: 75K9MUAP42KT)
